MAJOR IN EXERCISE SCIENCE

The major in Exercise Science is intended to examine the relationship between exercise and human performance and the role of physical activity in the promotion of healthy lifestyles. Exercise Science consists of several overlapping disciplines, including biomechanics, exercise physiology and biochemistry, growth and development, exercise nutrition, measurement and evaluation, and exercise psychology. The program of study is designed to provide an effective blend of classroom instruction and practical experience. The program is intended to prepare qualified individuals for careers in clinical, corporate, commercial, and/or community exercise/wellness settings as well as to prepare students for graduate study in related fields.

Requirements

The requirements for the Exercise Science major include a minimum of 39 units of KNES courses and 26-27 units of courses outside of KNES for a total of 65-66 units. A minimum of 21 units of Kinesiology courses (KNES), out of the 39 KNES units required for the Exercise Science major, must be completed at Towson University.
